

2016 SUN-n-FUN Forum - Expectation Bias in Pilot Deviations

Learn how to avoid a common Air Traffic Control error! This popular forum returns to show some of the numerous ways pilots can get into trouble by expecting one specific and routine ATC clearance, but actually receiving a different set of instructions. And controllers are not immune either: they may miss an incorrectly executed instruction until a situation becomes very critical. See a veteran Air Traffic Controller from Daytona Beach Air Traffic Control Tower as he introduces the psychology of Expectation Bias, and analyzes numerous examples of it. This is a live presentation only.

Directions: The FAA Safety Center (new name: Orlando Field Office) is centrally located on the Sun-n-Fun grounds at the corner of Laird Drive and Sun-n-Fun Road. Forums entrance is on the west side of the building.

A message from the National FAASafety Team Manager

Invite a fellow pilot to the next WINGS Safety Seminar in your area.

Sign up for the FAA's safety services at www.FAASafety.gov!
